

PRODUCT:

Movieee.ug

THEME:

Crowdsource Q&A for movies

CREATED BY:

ÁRON SZ. and ZSÓFIA SZG.

ABOUT THE PROJECT

Git commits

SECTION : Monday

SECTION: Tuesday

- Setup project
- List page, add question added

SECTION: Wednesday

- Display, edit, delete question
- Overall style

SECTION: Thursday

- Post, delete answer
- Error html for update question
- Create ppt
- Sorting

ABOUT THE PROJECT

```
@app.route("/question/<int:question_id>/edit", methods=["GET", "POST"])
def edit_a_question(question_id: int):
    question_csv_file = data_manager.question_file_path
    questions = connection.get_data_from_csv(question_csv_file)
    updated_question = {}
    try:
        if request.method == "GET":
            for question in questions:
                if int(question["id"]) == question_id:
                    return render_template("update_question.html", question_id=question_id, question=question)
        elif request.method == "POST":
            for key in data_manager.QUESTION_HEADER:
                updated_question[key] = request.form.get(key)
            updated_question["id"] = question_id
            connection.update_data_in_csv(csvfile=question_csv_file, updated_data=updated_question, given_list=questions, data_header=data_manager.QUESTION_HEADER)
            return render_template("display_question.html", question_id=question_id, question=updated_question)
        else:
            abort(HTTPStatus.METHOD_NOT_ALLOWED)
            return None
    except Exception as e:
        return render_template('error.html', question_id=question_id), HTTPStatus.INTERNAL_SERVER_ERROR
```
